Senate Street Surgery Center (Indianapolis)	1	4,367
Total Reported Events in Ambulatory Surgery Centers	5	

Total Reported Events (All Entities)	107

Appendix B

The data tables for individual hospitals found in Appendix B provide the number of inpatient discharges, the number of outpatient visits, and the number of procedures performed by each hospital. This data is provided for the purpose of comparison of how many individuals seek medical services and how many surgical procedures are performed by each hospital in relation to the number of reported events. This data is required to be reported to the Indiana State Department of Health by hospitals no later than 120 days after the end of each calendar quarter. The Indiana Hospital Association is the contractor that collects the data from each hospital. They perform quality checks and report the data to the Indiana State Department of Health in a standardized format.

Appendix B reflects the number of inpatient discharges, the number of outpatient visits, and the number of procedures performed by each hospital reported for the calendar year 2010 by hospitals as of July 13, 2011.

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2010. The report was sent in June 2011. Facilities were instructed to review their data for correctness and completeness. Facilities then returned a verification of data to the ISDH. In July 2011, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. The report for each facility reflects whether the data was verified by the facility.

HOSPITAL DATA				
Data Category	Definition	Total Number Reported		
Inpatient Discharges	Inpatient Discharge means the discharge of an individual who had been admitted to the hospital as an inpatient. It does not include hospice, skilled nursing facility and observation patients.	799,794		
Outpatient Visit	Outpatient Visit refers to a visit to a facility for the purpose of emergency services, outpatient surgery, occupation and physical therapy/rehabilitation, cardiac diagnostic and treatment procedures, or psychiatric and social services. These classifications are based on selected billing or diagnosis codes.	3,891,637		
Procedures	Procedure includes any surgical procedure coded "00.30" to "86.99" inclusive in the principal procedure field as reported by the hospital for both inpatient discharges and outpatient visits.	1,270,063

Appendix C

As a way of providing some comparative figures for ambulatory surgery centers and the reported events, the reports for individual ambulatory surgery centers found in Appendix C provide the number of procedures performed by each ambulatory surgery center. This data is provided for the purpose of comparison of how many patients are treated and how many procedures are performed by each ambulatory surgery center in relation to the number of events reported. This data is required to be reported to the Indiana State Department of Health. Appendix C reflects the surgical procedures performed as reported by ambulatory surgery centers for the calendar year 2010.

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2010. The report was sent in June 2011. Facilities were instructed to review their data for correctness and completeness. Facilities then returned a verification of data to the ISDH. In July 2011, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. The report for each facility reflects whether the data was verified by the facility.

AMBULATORY SURGERY CENTER DATA			
Data Category	Definition	Total Number Reported	
Procedures	Procedure includes any procedure reported by the ambulatory surgery center on the ASC Utilization Report, State Form 49933.	490,663

APPENDIX D

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2010. The report was sent in June 2011. Facilities were instructed to review their data for correctness and completeness. Facilities then returned a verification of data to the ISDH. In July 2011, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. A few facilities failed to return the verification prior to the publishing of the report. The report for each facility reflects whether the data was verified by the facility.

APPENDIX E

In order to eliminate mistakes in the report and give facilities the opportunity to review their data for accuracy, the ISDH sent to each facility their final report for 2010. The report was sent in June 2011. Facilities were instructed to review their data for correctness and completeness. Facilities then returned a verification of data to the ISDH. In July 2011, the ISDH contacted all facilities that had not returned their verification form to request that the form be returned. A few facilities failed to return the verification prior to the publishing of the report. The report for each facility reflects whether the data was verified by the facility.
